

Table 1. Means, Standard Deviations, and Correlation Coefficients for a Model of Earnings Attainment, for Typesetters and Compositors, Experienced Civilian Labor Force, 1980\*

	<u>Age</u>	<u>Sex</u>	<u>Education</u>	<u>Hours per year</u>	<u>Earnings</u>	<u>Means</u>	<u>Standard deviations</u>
Age	1.00	.348	-.176	.114	.307	37.0	13.7
Sex		1.00	-.096	.186	.502	.454	.498
Education			1.00	-.009	-.057	12.4	1.85
Hours per year				1.00	.520	1755	616
Earnings					1.00	11544	7713

\*Sample includes only those who worked in 1979, and who were at work during the reference week.

Source: 1980 Census Microdata (U.S. Bureau of the Census, 1983a).

Table 2. Model of Earnings Attainment for Typesetters and Compositors, Experienced Civilian Labor Force, 1980<sup>a</sup>

<u>Unstandardized coefficients</u>	
Age	71.3*
Sex	5843*
Education	22.5
Hours worked per year	5.44*
Intercept	-3579*
R <sup>2</sup>	.454
<u>Standardized coefficients</u>	
Age	.127*
Sex	.377*
Education	.005
Hours worked per year	.435*

\*p < .001

<sup>a</sup>Sample includes only those who worked in 1979, and who were at work during the reference week.
